

Ahmed Homrani

Full Stack Developer

Phone: +216 99340980 **Email:** contact.ahmedhomrani@gmail.com **Linkedin:** [Ahmed-homrani](#)

Profile

Experienced Full Stack Java/Angular/Spring Boot Developer with expertise in microservices architectures and DevOps workflows. Specialized in designing secure APIs (Spring Security, OAuth2), optimizing databases (PostgreSQL, MongoDB), and automating deployments (CI/CD, Docker). Passionate about Clean Architecture and software quality to deliver high-performance and scalable solutions.

Technical Skills

- **Languages & Frameworks:** Java, Angular, Spring Boot, Spring Security, Spring Data, TypeScript, OSGI, Eclipse EMF, HTML5, Bootstrap, CSS
- **Databases:** PostgreSQL, MongoDB, Oracle, MySQL
- **DevOps & Tools :** Docker, Kubernetes, GitLab CI/CD, Jenkins, Maven, Jira, Hibernate, Microsoft Azure, Apache ActiveMQ, RabbitMQ, Kafka
- **AI-Assisted Development:** GitHub Copilot, Claude Code, Cursor, Prompt Engineering

Professional Experience

Java Developer ([Audaxis](#))
[SmartDigiDocs](#)

Lac 1, Tunisia 08/2024 - Present

- Secured the development lifecycle (DevSecOps) by integrating automated SAST and DAST audits into Jenkins and Azure DevOps pipelines.
- Architected a multi-tenant service architecture using OAuth2, SAML, and JWT, delivering more robust RBAC/ABAC enforcement, consolidated audit trails, and full zero-trust alignment across all tenant boundaries.
- Developed a module for generating SEPA codes for payments.
- Built XML validation mechanisms for PEPPOL and EN16931 standards.
- Designed a critical QR code validation module processing over 5,000 documents, ensuring interoperability with more than 100 customer systems.
- Deployed services in Jenkins and orchestrated builds using Azure DevOps pipelines.
- Managed Active Directory directories via JNDI Realm and LDAP for user authentication and access management.
- Followed TDD and Agile methodologies, delivering well-tested features on a sprint schedule.

Technical Environment: Java, Angular, OSGI, Eclipse EMF, Jenkins, Docker, Git, GitLab CI/CD, Maven

Full Stack Java Developer, ERP Analyst ([Audaxis](#))
[APIZ & Compire](#)

Lac 1, Tunisia 09/2023 - 07/2024

- Designed and implemented new features and complex evolutions on the ERP using Java/JEE, Spring Boot (backend) and Angular/TypeScript (frontend).
- Functional analysis, rapid diagnosis and resolution of critical bugs to maintain system stability and performance.
- Optimized SQL performance (PostgreSQL/Oracle) drastically reducing response times of critical ERP modules.
- Set up and integrated APIs to connect the ERP with other business applications and services.
- Established automated CI/CD pipelines under GitLab, orchestrated via Docker and Kubernetes to ensure reliable and continuous deployments.
- Collaborated with business teams to understand requirements and ensure alignment of technical solutions.

Technical Environment: Java, JEE, Spring Boot, Angular, TypeScript, PostgreSQL, Oracle, Docker, Kubernetes, Git, GitLab CI/CD

Full Stack Developer Intern (ISI)

Ariana, Tunisia02/2026 - 06/2026

- Designed and developed a full stack digital health platform connecting patients and doctors, featuring a real-time appointment booking system and secure medical records management.
 - Architected a RESTful API using Java Spring Boot, implementing JWT-based authentication, role-based access control (RBAC), and encrypted communication via HTTPS.
 - Built a cross-platform mobile application with Flutter for iOS and Android, providing patients with instant access to their appointments and medical records.
 - Designed and optimized the persistence layer using Spring Data JPA, handling complex medical data with high-performance queries under concurrent load.
 - Implemented a real-time notification system for appointment reminders and booking confirmations.
- Technical environment: Java , Spring Security , Spring Boot , TypeScript , Angular , Flutter , Dart , PostgreSQL , GitHub , Kafka

Full Stack Developer Intern (Digital Power Consulting)

Manzah 6, Tunisia02/2023 - 06/2023

- Built a full-featured Human Resource Management application with Angular and Spring Boot.
 - Implemented secure authentication and role-based access control.
 - Created user-friendly interfaces and reusable UI components.
 - Collaborated within an Agile team with daily scrums and weekly sprint reviews.
- Technical Environment: Java , Spring Security , Spring Boot , TypeScript , Angular, MySQL , GitHub

Education

Bachelor's Degree in Computer ScienceIstic - University of Carthage

Ben Arous, Tunisia2020 - 2023

Professional Master's in Software Development and New TechnologiesIsi - University of Tunis El Manar

Ariana, Tunisia2024 - 2026

Languages

- Arabic [Native]
- French
- English [IELTS ACADEMIC C1]
